Educational Worksheet

Grade 7 Mathematics Worksheet							
Map Scale							
Name:	Date:						
Learning Obj	ectives						
_	stances and real distances -	able to: - Understand and interpret map scales - Conve Solve problems involving scale drawings - Apply sca					
Instructions							
• Show all yo	our working clearly						
• Include cor	rect units in your answers						
• Use a ruler	when measuring is required						
• Remember: Map distance × Scale = Real distance							
Section A: U	Inderstanding Scale	(6 marks)					
Answer these qu	estions about map scales:						
1. Scale Inter	pretation: A map has a sca	ale of 1:50,000. This means:					
• 1 cm	on the map represents	cm in real life					
• 1 cm	on the map represents	m in real life					

• 1 cm on the map represents km in real life						
2. <u>Scale Comparison</u> : Which scale shows more detail? Circle the correct answer: <u>1:25,000</u> or						
<u>1:100,000</u>						
Explain your answer:						
3. <u>Scale Writing</u> : Write these scales in ratio form:						
o 1 cm represents 2 km:						
• 1 cm represents 500 m:						
o 2 cm represents 1 km:						
Section B: Map Distance to Real Distance (8 marks)						
Convert these map distances to real distances:						
Convert these map distances to real distances: 4. Scale 1:20,000 Map distance: 5 cm Real distance: m						
4. <u>Scale 1:20,000</u> Map distance: 5 cm Real distance: m						
4. <u>Scale 1:20,000</u> Map distance: 5 cm Real distance: m 5. <u>Scale 1:50,000</u> Map distance: 3.5 cm						
4. <u>Scale 1:20,000</u> Map distance: 5 cm Real distance: m						
4. Scale 1:20,000 Map distance: 5 cm Real distance: m 5. Scale 1:50,000 Map distance: 3.5 cm Real distance: km						
4. <u>Scale 1:20,000</u> Map distance: 5 cm Real distance: m 5. <u>Scale 1:50,000</u> Map distance: 3.5 cm						
4. Scale 1:20,000 Map distance: 5 cm Real distance: m 5. Scale 1:50,000 Map distance: 3.5 cm Real distance: km						
4. Scale 1:20,000 Map distance: 5 cm Real distance: m 5. Scale 1:50,000 Map distance: 3.5 cm Real distance: km 6. Scale 1:25,000 Map distance: 8 cm Real distance: m						
4. Scale 1:20,000 Map distance: 5 cm Real distance: m 5. Scale 1:50,000 Map distance: 3.5 cm Real distance: km 6. Scale 1:25,000 Map distance: 8 cm Real distance: m						
4. Scale 1:20,000 Map distance: 5 cm Real distance: m 5. Scale 1:50,000 Map distance: 3.5 cm Real distance: km 6. Scale 1:25,000 Map distance: 8 cm Real distance: m 7. Scale 1:100,000 Map distance: 2.4 cm Real distance: km						
4. Scale 1:20,000 Map distance: 5 cm Real distance: m 5. Scale 1:50,000 Map distance: 3.5 cm Real distance: km 6. Scale 1:25,000 Map distance: 8 cm Real distance: m 7. Scale 1:100,000 Map distance: 2.4 cm Real distance: km						

10. <u>Scale 1:200,000</u> Map distance: 4.5 cm Real distance: km
11. <u>Scale 1:15,000</u> Map distance: 9.2 cm Real distance: m
Section C: Real Distance to Map Distance (8 marks)
Convert these real distances to map distances:
12. <u>Scale 1:30,000</u> Real distance: 1.5 km Map distance: cm
13. <u>Scale 1:40,000</u> Real distance: 800 m Map distance: cm
14. <u>Scale 1:25,000</u> Real distance: 2.5 km Map distance: cm
15. <u>Scale 1:60,000</u> Real distance: 1,200 m Map distance: cm
16. <u>Scale 1:80,000</u> Real distance: 3.2 km Map distance: cm
17. <u>Scale 1:50,000</u> Real distance: 750 m Map distance: cm
18. <u>Scale 1:35,000</u> Real distance: 1.75 km Map distance: cm
19. <u>Scale 1:45,000</u> Real distance: 900 m Map distance: cm
Section D: Scale Drawing Problems (8 marks)
Solve these scale drawing problems:
20. Garden Design: Sarah is designing a garden. She draws a plan using a scale of 1:200.

• The real garden is 24 m long. How long should she draw it on her plan?
<u>Answer:</u> cm
21. School Map: On a school map with scale 1:500, the playground measures 8 cm \times 6 cm.
• What are the real dimensions of the playground?
<u>Answer:</u> m × m
22. Model Car: A model car is built to a scale of 1:32. The real car is 4.8 m long.
How long is the model car?
Answer: cm
23. Room Plan: An architect draws a room plan using scale 1:100. The real room is 5.5 m \times 4.2 m.
• What should the dimensions be on the plan?
<u>Answer:</u> cm × cm
Section E: Real-World Applications (10 marks)
Apply your scale knowledge to these situations:
24. Walking Route: On a map with scale 1:25,000, Tom measures a walking route as 14 cm.
• How far will he actually walk?
• If Tom walks at 4 km/h, how long will the walk take?
Distance: km Time: hours minutes

25. <u>City Planning</u> : A town planner uses a map with scale 1:10,000 to plan a new road.						
• The road on the map is 23 cm long						
• What is the real length of the road?						
• If the road costs £50,000 per km to build, what will the total cost be?						
Real length: km Total cost: £						
26. <u>Treasure Hunt</u> : Children are using a map with scale 1:2,000 for a treasure hunt.						
• They need to walk from point A to point B, which are 15 cm apart on the map						
• Then from point B to point C, which are 8 cm apart on the map						
What is the total real distance they need to walk?						
<u>Answer:</u> m						
27. <u>Comparison Problem</u> : Two maps show the same area:						
 Map 1 has scale 1:50,000 and the distance between two towns is 6 cm 						
 Map 2 has scale 1:100,000 						
• What would the distance between the same two towns be on Map 2?						
<u>Answer:</u> cm						
28. <u>Scale Drawing Challenge</u> : A rectangular field is 150 m long and 80 m wide.						
• Draw this field using a scale of 1:5,000						
• What dimensions should your drawing have?						
• If you used a different scale of 1:2,000, what would the dimensions be?						

Scale 1:5	<u>5,000:</u>	cm ×	cm <u>Scale 1:2,000</u>	<u>0:</u> cm ×	< cm
Total:/	40 marks				
Self-Assessn	nent				
• I underst	and what ma	np scales mear	n: Confident Mos	stly □ Need prac	ctice
• I can con	vert map dis	stances to real	distances: □ Confide	nt □ Mostly □ 1	Need practice
• I can con	vert real dis	tances to map	distances: □ Confide	nt □ Mostly □ 1	Need practice
• I can solv	ve scale prob	olems: Con	fident □ Mostly □ Ne	eed practice	
Key Formul	as to Rem	ember			
• Real dist	tance = Maj	o distance × S	Scale number		

• <u>Map distance = Real distance ÷ Scale number</u>
